

New danglers in PU by Progalvano™

Endurance and flexibility for long life & better performance

Moulded piece in PU
sealing cable lug
termination

Brass interchangeable
head and moulded
joint in PU

Protective sheath in PU

Progalvano™'s dedication to continued research and development enhances its product range by producing a new range of cathode dangler contacts specifically designed to give **IMPROVED OPERATION, LONG LIFE** and **COST EFFECTIVENESS**.

The new PU cable sheath is both tough and highly flexible resulting in outstanding performance together with improved robustness, higher resistance against abrasion with a sealed conductor cable giving your barrels higher efficiency and durability.
